

SunRay 400 watt or 600 watt Economical UV Flood Cure System

The SunRay is a compact, high-power UV flood curing system. All system components are integrated into a small lamp head which can be easily mounted on the optional Stand & Shield, or anywhere on a factory floor, with virtually no cabling or remote power boxes required. Just mount the head, connect the AC line cord, and start curing! The long life 400 or 600 watt arc lamp and parabolic reflector illuminate an 8" x 6" curing area with evenly distributed UV light. The arc lamp is powered by the state of the art UV Power-Plus Lamp Driver. For a larger version of this system, see the SunRay Quad. The head features a convenient carrying handle and sliding height adjustment bracket.

Features:

- 175 mW/cm² Intensity @ 3"
- 8" x 6" curing area
- Solid-state / Constant Power
- Compatible with UV Conveyor 40
- Standby Power Switch
- Optional Shield / Mounting Stand
- Optional UV Cure Chamber

SunRay shown with optional front & rear UV shields

The SunRay is available with UVA, UVB or visible spectrum lamps for the 400W & 600W systems, ensuring compatibility with adhesives and coatings from all manufacturers.

SunRay can be used as a stand alone system , or mounted to the Rayven cure chamber, or Front/Rear UV shields, as shown.

Some functions can be controlled remotely via a connector on the rear of the unit. Other remote functions can be available as a special order.
